## GET REAL

Those rumors you heard are true. Yes, you can have your pink ostrich leather and an Eames chaise too. Really. Or perhaps leopard is more your style? Customizing classic Herman Miller furniture in nontraditional leather colors and textures is no longer a renegade act, the stuff of urban design legends. The company has teamed up with venerable Edelman Leather to offer Herman Miller for the Home, a collection of about 20 classic designs in Edelman's range of 600 colors. With designs by Charles and Ray Eames, George Nelson, Alvar Aalto and Mark Goetz, we expect the collectors to hoof it to their designer straight away. The all-leather showroom in Dallas Design Center is among several to feature the new collection, which debuted recently. Shown above, Eames Executive Chair with Edelman Modern Metallic Night Blues leather available to interior designers at Edelman showroom, Dallas Design Center, 214.748.6666 or visit [www.edelmanleather.com](http://www.edelmanleather.com). -E.A.
