PERENNIALS

A cheerful group of positive colors evoking a universal love of flowers.

Think of them as a new palette for an advertising company's boardroom, or an executive office for a human resource department, or a palette for a Soho loft, or a theme for a seaside bar or restaurant or a sunroom.

Used together, separately or in pairs, these colors work together, as they do in nature - they never clash.

The PERENNIALS look great also with White, Pitch Brown, Whiskey, etc. They are not pastels - they are perennial flower colors - not too sweet - somewhat assertive and, after all, who doesn't love flowers.
