

EDGE STAIN RELEASE

Edelman EDGE Stain Release, an additional finish that allows for simple stain removal, offers peace of mind without compromising the inherent natural beauty of our leather — its luxurious look, feel, and scent. And with our leather in use everywhere, from planes to hotels to shops to homes, protection from the common spills that are part of life — coffee, wine, ketchup — is essential.

EDGE, standard with no extra cost on Edelman Core leathers, goes beyond the already-reliable finish of our leathers for added protection. It's also available upon request on other select semi-aniline finished products.

We care deeply about our leather and our clients. EDGE is one more sign of our commitment to both.
