

LASER ETCHED

product overview

Laser etching brings your most fanciful visions in leather to life. We offer several made-to-order laser-etched designs, including our iconic Dot Skull, and custom patterns are always welcomed. As your partner in all things leather, we work closely with you to ensure the success of custom patterns and will suggest adjustments as needed to work within this medium.

USE

Dividing room screens, wall panels, backs of chairs, headboards, lamp shades, curtains, pillows, table insets, and logos.

LEATHER

Available on Cavallini, Royal Suede, and Napoli.

LEAD TIME

Lead time for stock leather is 3-4 weeks upon CFA approval. For custom colors, including back-dye process, please allow 6-8 weeks.

LASER ETCHED

product overview

BACKING

Once laser etched, products will feature a natural ground/base. This is the natural hide showing through and is not a controlled color. If preferred, we are able to back-dye hides for a layered look, with the ground/base color darker than the fur color.

CAVALLINI

Cavallini is a natural hair-on hide product. There will be variations in hair length and hair direction within each hide. This may create a slight unevenness to the laser-etched areas. We cannot control this effect, which is natural and part of the appeal.

CUSTOM PATTERNS

Outside of our seven one-of-a-kind and made-to-order designs, we offer customization as well. Patterns can be submitted in JPEG or EPS files. Designs will be reviewed to ensure the success of the project. Due to the nature of the material and process, not all patterns are possible. Scale may need to be adjusted.

Maximum laser pattern length is 160 cm/63". Since the hide is shifted during the process, there are often breaks in the pattern and line positions. These lines are more visible in a larger pattern or very linear patterns.

UPON ARRIVAL

Laser etching is done with a laser, which burns the top layer of the hide. This creates a smell that will dissipate over a short period of time. Upon arrival, we suggest opening the box and laying out the hides to allow them to breathe.
