embossing overview

Platelines

We use a plate to emboss this pattern, which offers a deeper, richer emboss. Platelines appear every 635 millimeters, approximately three times on one half hide. The pattern and color combination both contribute to the variations in how obvious these lines appear.

Pattern Depth

Leather is a natural product and it may take the embossing effect differently across the hide. There will be some variation in the depth of the embossed pattern print.

Variation in Hand Antiquing

Jumbo Crocodile is a hand-antiqued leather. Therefore, there will be some variation in color and tonal effect of the tipping within a hide and from hide to hide.
